

Mobile Guardian for macOS

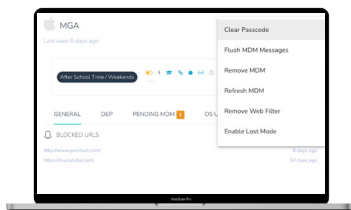

Priced and purpose-built for schools, Mobile Guardian makes it easy to manage all your macOS devices. The multi-OS solution offers MDM controls, Classroom Management Tools and comprehensive web-filtering.

Mobile Guardian supports

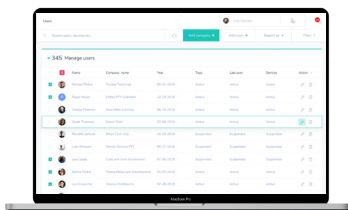

Award winning features

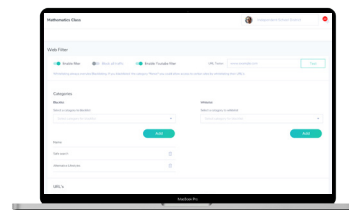

MDM Controls

Enrol macs, deploy apps, wipe devices and reset device passwords without ever leaving your desk.

In-class Management Tools

With an easy-to-use dashboard, your teachers can eliminate distractions and unlock the learning potential of Macs in their classrooms.

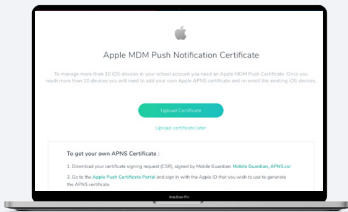

Comprehensive Web Filtering

A vital, online protection layer for K-12 schools. A dynamic and comprehensive, CIPA-compliant solution that protects your macs from harmful online content.

Fully Integrated for macOS Management

The Mobile Guardian platform works with Apple School Manager, the Volume Purchase Program (VPP), as well as the Device Enrolment Program (DEP).

ASM / Classroom

This web-based portal allows I.T. managers to quickly and easily deploy macOS devices in their schools.

Volume Purchase Program (VPP)

With this program, schools are able to purchase volumes of apps and books to distribute amongst students and staff.

Device Enrolment Program (DEP)

Automate the enrolment and configuration of your macOS devices with this online service.

Manage macOS devices with ease

Remotely Push Content

From your dashboard, push content like Youtube links and web links to all your macOS devices.

Age-Appropriate Store Content

Restrict app store content and ensure that devices can only access age-appropriate content in line with your eSafety policy.

Managed Application Deployment

The self-help portal that allows I.T. managers to efficiently manage and coordinate a large volume of apps throughout the school year.

Self-help App Portal

Using the portal I.T. managers can efficiently coordinate a large volume of apps across all the devices in the school.

Student Linking with AD Authentication

Shared device program? Students can quickly login to a device with Active Directory authentication.

Remote Passcode Clearance

Clear the device passcode from within the Mobile Guardian dashboard and from the comfort of your desk.

Lost Mode

Remotely activate Lost Mode to lockdown the device, protect it and track its location.

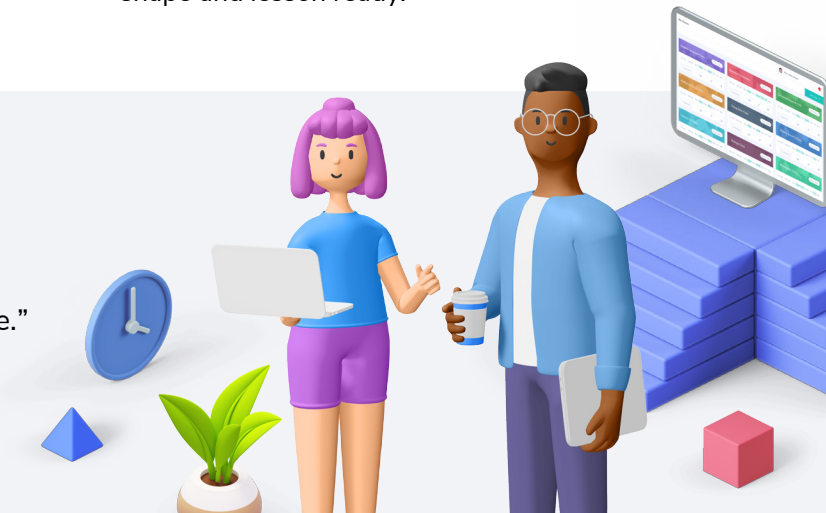

Inventory Management

Keep an eye on all your macOS devices and ensure that they're always in tiptop shape and lesson ready.

"Mobile Guardian works seamlessly throughout our organisation. The control and rollout of apps is easy to manage. Support is always helpful and they explain things in a way that isn't too techie but understandable."

James C
Deputy Principal
